PIXXEL.com

Introduction

Pixxel is a stock image website where you can get stock images for your website or graphic design or might be any project you working on. Stock images is existing photos –already created– made available for license by paying a fee to both the artists that produced them and the pixxel team for managing them.
Images can be stock photographs, graphic designs, vector art or illustrations.

So basically In pixxel we can download stock images for free but the user has to acknowledge the creator's right over the image by giving credit to the creator. Also you can buy the image by giving a tip to the creator using our pixxel wallet.

Creator can create his own collections to showcase his art and create a brand for himself.
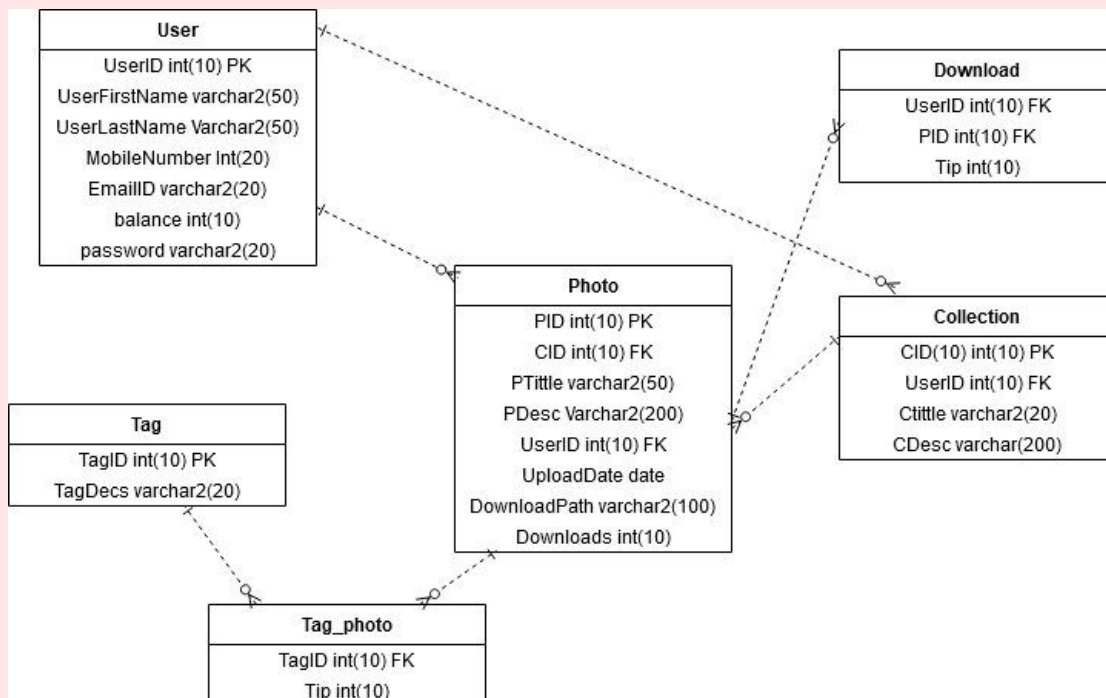

Requirements

Front End : html, css, bootstrap
Back End : MySql Database

Objective

- To create a site where you can get Stock Images for your personal or commercial use.
- Designers can get exposure by displaying their art and get money through it.
